 **LEXUS**
EXPERIENCE AMAZING

THE LEXUS IS

How does one begin to push the limits of dynamic performance? By building the most rigorous test course a Lexus has ever seen. A sports sedan forged on the Shimoyama test track and crafted to achieve the most balanced and linear performance any Lexus has ever had. Bravely designed to change the game as it introduces the Lexus Driving Signature: meet the Lexus IS.

Built for an even more exhilarating drive, experience improved handling and performance with the IS F-Sport's forged alloy wheels and the new limited slip differential. Excitement never compromises safety with new Lexus Safety System features including Rear Cross Traffic Alert and Blind Spot Monitor.

PUSHING THE LIMITS OF PERFORMANCE

The Lexus IS is a heart-racing marvel that feels as athletic both on the track, and on your way back home. This compact sports sedan will reinvigorate your appetite for the exhilarating, as it enables you to fully engage in communication with the car through various driving scenes. That is, after all, the philosophy behind the new Lexus Driving Signature: enhancing dynamic handling to create a seamless connection between driver and vehicle. And the new IS delivers on that and more, as its remarkable refinements include precise steering, linear response, and impressive agility. You'll conquer any corner or straight line as you wish, staying fully in control of whatever lies ahead. And not only will you do it in style, but also with an unmatched level of comfort and confidence that you can only get while driving the Lexus IS.

DESIGNED TO CHANGE THE GAME

We wanted to set a new standard; one that was yet to exist. So we started by building a high performance test track so un-precedented, in order to develop our most bravely designed Lexus yet. Its handling was improved through weight reduction, aerodynamic stability, and a low center of gravity. Its coupe-like form is styled to look aggressive yet elegant in the way it moves. And it also redefines ride comfort with its overall quietness, achieved through the elimination of unwanted noise. Human-centered advanced technology will enable you to drive in greater safety and comfort, thanks to the new Lexus Safety System+2. At the heart of this design is the driver experience, and the richness one gets from driving the Lexus IS is the result of being crafted beyond the predictable in order to change the game.

EXTERIOR & INTERIOR COLORS

A selection of sophisticated exterior colors heightens the IS' provocative style and distinctive identity, powerfully expressing the agile driving feel. It is complemented in the cabin by the two-tone color schemes that deepen the feeling of exhilaration.
